

JOIN THE A'n D CABLE RACK REVOLUTION

THE ADJUSTABLE DEPTH "ZERO U" HORIZONTAL RACKORGANIZER®

RACKORGANIZERS THAT ROCK YOUR RACK

The A'n D Cable patented Adjustable Horizontal "Zero U" RackOrganizer® System manages all your cables on 19" equipment racks and cabinets (front and back) without using ANY valuable rack space.

Revolutionize your rack space.

Your goal is to optimize efficiency, cost, and ease of use. The

Adjustable "Zero U" Horizontal RackOrganizer® returns rack space to you by routing cables in the same space as your device.

For rack retrofits, 25-35% of your space is occupied by traditional cable management that uses 1U or 2U.

Ideal for broadband head ends, the Adjustable "Zero U" Horizontal RackOrganizer® recovers that

space for new and retrofit installations. Use the "Zero U" advantage to stack more active devices with room for air circulation to keep your rack cool.

The Adjustable "Zero U" Horizontal RackOrganizer® offers maximum flexibility. Use the 83-R08-19-05 or 83-R013-19-05 with either the 3 or 5 inch extenders to vary the depth from 5 to 9 inches.
