## VERTICAL CABLE MANAGERS

### CABLE MANAGERS THAT CLEAN-UP YOUR RACK

The A'n D Cable patented Vertical Cable Managers manages all your cables on 19" or 23" equipment racks and cabinets (front and back).

#### Revolutionize your rack space.

Vertical cable management is often an afterthought. Most vertical cable management products are

expensive. Our cost-effective solution offers flexibility in depth, width and height. Most verticals are in one piece, but usually you don't need the entire cable manager.

Use the 83-VCM8- series Vertical Cable Managers for maximum flexibility and create cable management for 22U, 33U, or 44U. Use the 11 U Vertical Cable

Managers for outside plant distribution boxes.

With the 83-VCM8- series Cable Managers you can bundle fiber separately from copper. The cable bundle is in full view, making it easy to follow a cable for trouble shooting. The 83-VCM8- series Vertical Cable Managers are ideal for all rack installations.

## A'n D Cable Products- Your Unfair Advantage

A veteran and minority-owned company with over 25 years experience in the industry, A'n D Cable Products offers the patented 83-VCM8- series Vertical Cable Managers to leave your cables visible, unlike most vertical cable managers that hide your cables behind a cabinet door. A tangle of cables inside the cabinets can make it hard to trace connections.
